Selecting the right panel skin for your application is crucial for long-term performance of your installation. ASKIN® offer a modern range of designer colours as part of our standard range with a selection of metallic coatings from Z275 galvanised substrate to next generation COLORBOND® steel on an AM100 Aluminium-Zinc-Magnesium substrate. For more severe environments a limited range of colours may be available in the Ultra and Stainless Steel ranges.... Subject to MOQ.

The COLORBOND® steel colours shown have been reproduced to represent product colours as accurately as possible. However, limitations of web palette colours affect colour tones. Please note if you are printing this page the colours should not be used for colour matching.
